

## SYNTHIE db SHOCK

Speaking of George from Alien Skin, I credit him with my discovery of this great solo act. George posted a clip of her music on Facebook yesterday, and I was very impressed by what I heard. With a wonderfully melancholy vibe, her synth-pop is a perfect pairing for fans of The Cure, Gary Numan, or New Order (all of which she cites as her own influences, btw). The music has a decidedly gothic spin to it, and it's beautifully done. The programming and arrangements are really first rate. For long-time indie synth-pop fans in the US, you may remember a band from the 90's called Agnes Poetry. Synthie db Shock sounds very similar..... which is a very good thing! Her voice is perfectly suited for her dark blend of synth-pop, as it perfectly compliments her lively, yet dark arrangements.

This was a truly wonderful find for me. Thank you, George! 😊

You can buy Synthie db Shock's album via iTunes and Amazon. You can also check out a sampling of her songs via SoundCloud. I also recommend you check out her website:
